EDUCATION

Northeastern Mindanao State University

Expected 2028

Bachelor of Science in Computer Science

Cantilan, Surigao del Sur, PH

- Relevant Coursework: Web Systems & Technology I-II, Software Engineering I-II

Visayas State University

Transferred 2023-2025

Bachelor of Science in Computer Science

- Relevant Coursework: Data Structures and Algorithms, Fundamentals/Intermediate Programming
- Clubs: VSU Computer Science Student Society - CS³

EXPERIENCE

Frontend Developer

December 2025 – April 2026

Moonton Student Leaders Philippines, Moonton Technologies Inc.

Remote

- Designed and built highly reusable, modular components that accelerated development and ensured consistency across multiple projects.
- Developed a **Custom Tournament Registration Form** for teams and individual users, featuring a prize pool of **₱500,000 and 1,000,000** in-game currency, capable of handling thousands of concurrent participants without performance issues.

Freelance Developer

2024 – Present

Various Clients

Remote

- Designed and implemented web apps, mobile apps, interactive forms, and dashboards.
- Delivered custom features and responsive interfaces, serving up lots of users per project.

PROJECTS

Northeastern Mindanao State University E-Learning Environment

Ongoing

Fullstack, REST, NodeJS, Express, React, TypeScript, Azure App Services, SQL

- An online platform for educational content and classes used by students and faculty of NEMSU.
- Built both the user interface and REST API backend from scratch, creating a complete full-stack e-learning platform.

Sandra's: Mobile only E-commerce platform

2024 – Present

Fullstack, REST, NodeJS, Express, React, TypeScript, Azure App Services, MongoDB

- Developed a mobile-first e-commerce platform from scratch, including both the user interface and the RESTful API backend.
- Built custom REST API endpoints for product management, cart, and checkout functionality, ensuring seamless integration with the front-end.
